

VANTRAN RECENT PROJECTS

Vitro Flat Glass Retrofit Replacement

Vitro has been a major player in the commercial, residential, and automotive glass industry since 1883. With innovation and sustainability at the forefront of Vitro’s success, they have diversified their product offerings to meet the demand of various industries. From new construction projects such as the Amazon Spheres found in Seattle, to the windshield of your vehicle, Vitro products can be found all over the world. Vitro has been making investments in its electrical infrastructure and has chosen VanTran for another custom retrofit at its Wichita Falls, Texas operation.

VanTran supplied a custom 2500/2800/3125/3500 kVA 12.47kV to 480Y Substation minimizing civil and electrical work leading up to, and during, site outage. A containment pan was added for additional environmental protection. Retrofit replacements need to be precise to limit any delays in getting production back up and running, so Vitro trusted VanTran to provide a precise, high-quality product on time to meet their outage schedule with no interruptions.

VANTRAN VALUE PROPOSITION

-  Custom design limiting civil and electrical expenses.
-  Reliable delivery averting outage delays.
-  Consistent performance across multiple custom solutions.
